Concept Map

- Identify key concepts by analyzing notes and learning targets
- Concepts organized based on similarities or similar structure
- Each concept includes definitions & visuals
- Using previous exams/quick checks, add processes and one procedural question as needed within a concept. Use a different color for the procedural question
- Links are inserted between concepts that are connected
- Each link includes a reasoning question to support thinking (use a third color)
- Highlight one key word within a concept section that continues to be a challenge to master, based on quick checks/ tests
- Test out concept map by independently solving one routine/ non-routine problem per category
